DIMENSIONS

SAFETY

Read all instructions before installation.

Do not take apart lighting fixture.

Do not look directly into light.

Lighting outlet and on-site power supply cable connection must have IP68 level protection, so as not to affect normal operation.

This fixture is only suitable for installation in dry or sunny weather.

-  Product should be installed in accordance with these instructions, current electrical codes, and/or current National Electric Code (NEC).
-  Not recommended to be installed on the beach and corrosive chemical areas to avoid corrosion and damage..
-  Product should only be intalled and removed by a professional technician.
-  Product is 12V. Do not connect to 120V power source.

INSTALLATION

STEP 1 Open package to remove fixture and preinstall box.

STEP 2 Place the install box to pre-dug hole. Pull the prepared main power supply out through the box and connect with the fixture wiring.

** The joint of the wiring connection between the main power and fixture must be IP68 waterproofed in case of water leakage, which may cause short circuit.*

STEP 3 Test and ensure that all fixtures work. Put into preinstall box and press tightly.
