

PRE-INSTALLATION

Disconnect power source prior to installation.

INSTALLATION GUIDE

DIMENSIONS

SAFETY

Read all instructions before installation.

These products may present a possible shock, serious injury, or death if improperly installed.

Do not cover fixture with heat insulation gasket or similar materials.

Product should be installed by a qualified electrician.

Product should be installed in accordance with these instructions and current electrical codes.

To reduce the risk of fire or overheating, all connections should be tight and secure.

INSTALLATION

STEP 1

Pull the 120V supply wires through the recessed 4-inch junction box.

STEP 2

Connect the fixture wires to the supply wires using the approved wire nuts. Fasten the black (hot) to black, white (neutral) to white, and ground to ground. (Figure 1)

STEP 3

Attach the fixture wall plate with the cover gasket securely to the recessed junction box (not included) using the two screws. (Figure 2)
